

Senior Cloud Engineer

(West Division)

Planet Technologies is seeking an enthusiastic and self-motivated Senior Cloud Engineer to become an integral part of a growing team responsible for leading the deployment and adoption of Microsoft Cloud technologies for State and Local Government organizations. The Senior Cloud Engineer is a highly-technical position expected to serve as a subject-matter expert on the Microsoft Azure and Office 365 platforms. As a Senior Cloud Engineer, you play an active role in helping customers plan and execute cloud migrations, as well as adopt new cloud technologies. This is an exciting opportunity to have a direct hand in helping drive the new and exciting transformation in Government I.T. We are looking for an experienced consultant with strong Microsoft Cloud Expertise in one or more of the focus areas: O365 Suite-Exchange, SharePoint Online, Skype For Business, OneDrive for Business, Azure, PowerShell, Active Directory, EM+S, OMS.

The Senior Cloud Engineer will actively participate and lead projects centered around the adoption of Microsoft Azure, including the planning and migration of existing workloads to Microsoft Azure Infrastructure-as-a-Service (IaaS). Additionally, this individual will be required to draft project documentation, collaborate with project managers, and manage multiple projects and timelines. Additional opportunities to work with Office 365 (O365), Enterprise Mobility Suite, and Azure Security solutions is to be expected to meet customer needs.

Principal Duties and Responsibilities

- ✓ Be a primary technical resource working on projects for customers adopting Microsoft Azure (IaaS, PaaS, etc.)
- ✓ Communicate technical prerequisites and deploy Microsoft solutions in Azure and on-premises
- ✓ Troubleshoot and communicate issues impacting the success of assigned projects
- ✓ Draft project documentation
- ✓ Continuously learn new Microsoft technologies in Azure and within other Microsoft solutions (O365, EMS, Etc.) to meet customer demand.

Knowledge, Skills, and Abilities

- ✓ Required
 - Bachelor's Degree in Technical Field or four (4) years of experience
 - One (1) current technical certification related to Microsoft Technologies
 - Takes responsibility and has ability to manage own tasks and client deliverables
 - Intermediate to advanced knowledge of Microsoft Active Directory

- Good understanding of the following technologies: Networking, Load Balancing, DNS, Virtualization (Hyper-V, VMWare), performance monitoring, and capacity planning vi. Experience working with one or more Microsoft Cloud solution
- Ability to comfortably work with PowerShell
- ✓ Desired
 - Experience working Microsoft Azure and/or Office 365
 - Two (2) or more current technical certifications related to Microsoft technologies
 - Past experience consulting for medium to large enterprise customers

Other Duties and Responsibilities: Pre- Sales, Strong Customer Service Skills, Team Player, written and verbal communication.
