TECH THEORY

Accelerating the Mission of Government

Tech Theory, an 8(a) EDWOSB Mentor Protégé Joint Venture between J3 Consulting and Planet Technologies, delivers end-to-end technology solutions to drive tangible outcomes aligned with mission objectives for federal, state, and local government agencies.

APPLICATION MODERNIZATION
Tech Theory designs, develops, and manages complex IT systems and the applications that support them—leveraging modern technologies to ensure reliability, useability, and security.

ARTIFICIAL INTELLIGENCE
From teaching the fundamentals to building applications powered by AI to driving adoption and managing organizational change, Tech Theory helps government agencies safely embrace AI.

CYBERSECURITY
Tech Theory recommends and implements the latest zero-trust cybersecurity measures for security assessments, threat detection and prevention, access management, and incident response.

AGILE ACQUISITION
Tech Theory delivers full-spectrum acquisition and procurement support including strategic planning, program management, cost analysis, and systems requirements analysis.

Award sole source contracts under $4.5M in as little as 10 days
