

CELEBRATING TEN YEARS OF Evolve 365[®]

T H A N K Y O U F O R L E A R N I N G W I T H U S !

As Planet marks a decade of Evolve 365, our hearts are full of gratitude. To every customer, partner, and learner who has trusted Evolve 365 along the way—thank you. Your questions, feedback, and curiosity have shaped this program far more than any roadmap ever could.

Ten years ago, Planet Technologies launched Evolve 365. Our vision was clear: to empower individuals and organizations to thrive amidst technological change, but we knew the program could only succeed if we built it with our customers, not just for them.

Fast forward to now and this concept has become increasingly vital. With technology advancing at lightning speed, learning isn't just something "extra" or "optional" anymore. It's the secret sauce to building organizational resiliency. It's what enables end users to confidently use technology in a constantly changing environment.

As we mark this milestone, let's take a moment to reflect on what we have learned along the way—together.

Learning Should Grow with You

From the beginning, Evolve 365 was designed for real life—not perfect scenarios. It was built for real people dealing with real workdays, real challenges, and real change. We knew technology would keep changing. What mattered most was helping people keep up without feeling overwhelmed.

Over the years, you've shown us that learning works best when it's:

- Practical and easy to apply
- Available when you actually need it
- Part of your workflow, not something extra added on top

Together, we've learned that adoption doesn't come from one big training event. Rather it comes from small, steady learning moments that build the confidence, capability, and resilience of end users.

Learning Builds Community

Watching how you use Evolve 365 has taught us a lot. We've seen teams grow more confident, organizations adapt faster, and individuals discover they're capable of more than they thought.

Most of all, you've reminded us that:

- Change is easier when you're not navigating it alone
- Curiosity is a skill worth nurturing
- Small, consistent learning moments add up to real transformation

Your success stories—be it embracing new Microsoft 365 features, adopting Copilot, or navigating secure, compliant environments—are the true measure of Evolve 365's impact.

Learning Prepares Us for Change

The tools will keep evolving. Every day, AI is enabling new ways of working that are already reshaping our days. But one thing hasn't changed: people want learning that respects their time, meets them where they are, and helps them feel prepared—not pressured.

That's why Evolve 365 continues to focus on:

- Short, useful learning you can use right away
- Guidance built into the tools you already use
- Support for secure, responsible technology adoption

The focus has never been on chasing every emerging feature; rather, it is on ensuring you understand what is most important for your needs.

A Gift to Celebrate the Journey

To mark this milestone, we're sharing 10 free Evolve 365 videos—a collection of our favorite practical learning tips. These videos focus on real-world guidance that fits into your daily workflow and helps you achieve results efficiently.

These videos highlight the way we've always approached learning: embedded in the tools you use, designed for real-life scenarios, and focused on helping you achieve results without overwhelming your day.

Shaping the Future of Learning, Side-by-Side

As we look at the next decade, we're excited—not because change is coming, but because we get to navigate it with you. We'll keep listening, adapting, and evolving to support the way you work today and where you're headed next.

Thank you for trusting us, challenging us, and growing with Evolve 365. We're grateful for the journey we've shared and looking forward to what comes next. Here's to the next decade of continuous learning.

With Sincere Gratitude,
The Evolve 365 Team at Planet Technologies

THANK YOU!

Celebrating 10 Years of Learning.
